Forecast for Sunday 11 Jul 2021

Weather: A cloudy day in general, but this bringing misty conditions to summits and higher slopes through the early part of the morning. The odd spell of drizzle is also possible through the morning. More noticeable rain moving across the park over the course of the afternoon and remaining in place through the evening. There could be heavy bursts of rain at times.

Chance of cloud free mountain/hill tops above 600m: 40% in the morning. Rising to 70% in the afternoon, but falling to 40% in the evening.

Visibility: Cloud through the morning dropping to 350-450m, bringing poor visibility to summits and higher slopes. The cloud will lift over the course of the late morning to above the summits, allowing generally good visibility of surrounding hills through the afternoon. Visibility dropping in the rain developing through the afternoon, and will be very poor in heavy rain, which could also bring cloud bases down to 400m.

Meteorologist's View

Although the morning may be grey and cloudy, it is still important to stay hydrated when walking on the hills. Rain in the afternoon and evening will make slopes slippery, thus extra caution should be taken.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Monday 12 Jul 2021

Weather: A cloudy start to Monday with further patches of rain possible through the early morning. Showers developing from late morning onward, which will be frequently heavy and bring the risk of hail and thunder. Cloud breaking up through the afternoon, allowing some brighter spells to develop in between the showers. The showers will fade away into the evening and night.

Maximum wind: Winds on the summits initially southeasterly 15mph, transitioning to northwesterly 10mph from late morning onward.

Chance of cloud free mountain/hill tops above 600m: 30% through the morning, rising to 80% in the afternoon.

Visibility: Low cloud with bases 200-300m covering the park through the early hours, before gradually lifting through the rest of the morning. Hence, visibility on summits improving from poor to good through the morning. Visibility then temporarily dropping in any showers, and being very poor in heavy showers.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 20 Celsius.
At 600m: Plus 9 Celsius, rising to plus 12 Celsius.
Freezing level: Above the summits.
